DR. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY, LONERE – RAIGAD -402 103

Semester Winter Examination - Nov - 2019

Branch: Information Technology

Subject with Subject Code: -Microprocessors and Microcontrollers (BTITC401)

Marks: 60

Time: -3 Hr.

Instructions to the Students

- 1. Each question carries 12 marks.
- 2. Attempt any five questions of the following.
- 3. Illustrate your answers with neat sketches, diagram etc., wherever necessary.
- 4. If some part or parameter is noticed to be missing, you may appropriately assume it and should mention it clearly

<u>-</u>		Marks (6)
Q.1.	a) Draw and explain the architecture of 8088 microprocessor.	(0)
	b) Explain in details of maximum mode operation of 8086 family.	(6)
Q.2.	a) Compare Procedure & Macro.	(4)
Q.2.	b) Write an assembly program to add two numbers Program.	(4)
	c) Write an assembly program to multiply a number by 8 Program.	(4)
Q.3.	a) Draw and discuss the interrupt structure of 8086	(6)
~	b) Compare memory mapped I/O and I/O mapped I/O.	(3)
	c) Distinguish between SRAM and DRAM.	(3)
Q.4.		(6)
Q	b) List out data type supported by 8087.	(3)
	c) What are the addressing modes available in 8086?	(3)
)		(6)
Q.5.	a) Give detailed explanation for Intel 8051 microcontroller architecture with neat diagram.	(6)
	b) Explain the addressing modes of 8051?	(0)
Q.6.	a) Differentiate features of microprocessor and microcontroller.	(4)
7.3 6 2.01	b) Write down the Overview / features of PIC18 MCU.	(4)
er de griene di	c) What are the PIC18 Addressing Modes?	(4)

Semester Winter Examination:-Nov.- 2019

Subje	ect:- D		: 60		
Subject:- Discrete Structures and Applications (BTITC403) Date:- 30/11/2019 Instructions to the Students 1. Each question carries 12 marks. 2. Attempt any five questions of the following. 3. Illustrate your answers with neat sketches, diagram etc., wherever necessary. 4. If some part or parameter is noticed to be missing, you may appropriately assume it and should mention it clearly Q.1. (a). Obtain the DNF of following by using truth table method. i) (p→q)∧(~p∧q) ii)(p→(q→r)) ∧(~p→(¬p∧¬r)) (b). Prove by indirect method. For all integers m and n, if m and n are odd integers, then m + n is an even integer. Q.2. (a). Explain: i) Power set ii)The addition principal for disjoint set iii) Properties of set difference iv) Cardinality of set (b). State pigeonhole principal with suitable example. Q.3. (a). What is transitive closer of a relation? Find R* and draw its diagraph using Warshall algorithm, if A={a,b,c,d} and R={(a,b),(b,d),(a,c),(c,b)} Draw its diagraph. (b). 51 numbers are chosen from the integers between 1 and 100 inclusively. Prove that 2 of the chosen integers are consecutive. Q.4. (a). Explain: i) Transitive relation ii)Surjection & Bijection iii) Inverse and injective iv) Equivalence relation (b). State and explain rule of inference Q.5. (a). Explain Handshaking lemma principal? A connected planar graph has nine vertices having degrees 2, 2, 2, 3, 3, 3, 4, 4, 4 & 5.how many edges are there? How many faces are there? (b). For each binary operation * defined below, determine whether * is commutative or associative. (i) On Z, define a * b = a - b (ii) On Q, define a * b = a - b (iii) On Q, define a * b = ab + 1					
	٠ .		(Marks)		
Q.1.		i) $(p \rightarrow q) \land (\neg p \land q)$ ii) $(p \rightarrow (q \rightarrow r)) \land (\neg p \rightarrow (\neg p \land \neg r))$	(8)		
	(b).		(4)		
Q.2.	(a).	Explain: i) Power set ii) The addition principal for disjoint set	(2x4)		
	(b).	State pigeonhole principal with suitable example.	(4)		
Q.3.	(a).	What is transitive closer of a relation? Find R* and draw its diagraph using Warshall algorithm, if A={a,b,c,d} and	(8)		
	(b).	51 numbers are chosen from the integers between 1 and 100	(4)		
Q.4.	(a).	Explain: i) Transitive relation ii) Surjection & Bijection	(2x4)		
	(b).	State and explain rule of inference	(4)		
Q.5.	(a).	nine vertices having degrees 2, 2, 2, 3, 3, 3, 4, 4, 4 & 5.how many	(8)		
	(b).	commutative or associative. (i) On Z, define $a * b = a - b$	(2x2)		
Q.6.	(a).	Explain i) Complete graph ii)Regular graph iii)Bipartite graph iv) Degree and adjacency of vertex.	(2x4)		
	(b).	Explain lattice and its operator with the help of example. Paper End	(4)		

DR. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY, LONERE – RAIGAD - 402 103 Semester Winter Examination – December, 2019

Branch: B. Tech in Information Technology Subject:-Internetworking Protocols (BTITC404) Date:-02/12/2019	Sem.:- IV Marks: 60 Time:- 3 Hrs.
Instructions to the Students 1. Each question carries 12 marks. 2. Attempt any five questions of the following. 3. Illustrate your answers with neat sketches, di 4. If some part or parameter is noticed to be mis and should mention it clearly.	agram etc. wherever necessary.
Q.1. A) Explain layers in the TCP/IP protocol suite B) What is Gigabit Ethernet? Show its implementation of the protocol suiters and the protocol suiters are also becomes a suiter and the protocol suiters are also becomes a suiter and the protocol suiters.	
Q.2. A) Distinguish between direct and limited browith example networks.B) Explain the fields in IEEE 802.11 MAC fr	06
Q.3. A) Explain the fields which are related to fragof an IP datagram.B) Illustrate with figure, four different cases ARP (Address Resolution Protocol).	1
Q.4. A) How the <i>traceroute</i> program can be used from the source to the destination?	
B) Write and explain distance vector routing Q.5. A) Explain checksum calculation in UDP (Us	· ·
B) Draw simplified UDP package diagram, s their interactions. Write Input Module.	•
Q.6. A) Explain three way handshaking in TCP (T Protocol) connection establishment. B) What are the most common fields in TCP	06
Blocks (TCBs)?

	the circle $ z = 3$.		
Evaluation	A) Use Cauchy's integral formula to evaluate $\oint_{\mathcal{C}} \frac{\sin \pi z^2 + \cos \pi z^2}{(z-1)(z-z)} dz$, where \mathcal{C} is	ځ	

DR. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY, LONERE -RAIGAD -402 103

Winter Semester Examination – Dec - 2019

54

Branch: Information Technology

Sem:- III

Subject: - Switching Theory and Logic Design (BTITC302)

Marks: 60

Date: - 12 / 12 /2019

Time:-3 Hr.

Instructions to the Students

- 1. Each question carries 12 marks.
- 2. Attempt any five questions of the following.
- 3. Illustrate your answers with neat sketches, diagram etc., wherever necessary.
- 4. If some part or parameter is noticed to be missing, you may appropriately assume it and should mention it clearly

(Marks)

Q.1. Attempt all questions.

(a) Convert the following

(6)

- (i) $(3000.45)_{10} = (?)_8$ (ii) $(1076)_8 = (?)_{16}$ (iii) $(85.63)_{10} = (?)_2$
- (b) If the Hamming code receiver receives a sequence 1110110 is (6) determine whether it contains error or not, if there is any error correct it and determine the message bits transmitted.

Q.2. Attempt all questions.

- (a) Simplify using K-Map $f(a,b,c,d) = \Sigma m (0,1,3,5,9,12) + \Sigma d (2,4,6,7)$ (6)
- (b) Using QM method simplify $f(W,X,Y,Z) = \Sigma m (0,3,5,6,7,10,12,13)$ (6) $+ \Sigma d(2,9,15)$

Q.3. Attempt all questions.

- (a) With suitable diagram explain the working of TTL-NAND gate. (6)
 Also explain the use of multi-emitter transistor.
- (b) Draw the circuit diagram for CMOS-NOR gate and explain its (6) working using Truth-Table.

Q.4. Attempt all questions. Implement a Full Adder using 4:1 Mux. Discuss its working Design BCD to Excess-3 code converter. **(b)** Q.5. Attempt all questions. Compare Moore and Mealy State Machines (a) Describe in brief working of J-K Flip-Flop. Draw the suitable (6) (b) diagram for explanation. Q.6. Attempt all questions. (a) Design a combinational circuit using a ROM. The circuit accepts a (6) 3-bit number and generates an output binary number equal to the square of the input number. (b) Implement the following two Boolean functions with a PLA: (6) $F_1(A, B, C) = \sum (0, 1, 2, 4)$ $F_2(A, B, C) = \sum (0, 5, 6, 7)$ ***Paper End***

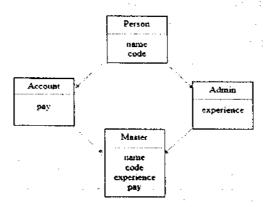

DR. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY, LONERE - RAIGAD - 402 103

Winter Semester Examination - December, 2019

	th Subject Code: - Object Oriented Paradigm with C++ (BTITC303)	em.:- III Aarks: 60 Time:- 3 Hrs.
1. 2. 3.	ons to the Students Each question carries 12 marks. Attempt any five questions of the following. Illustrate your answers with neat sketches, diagram etc. wherever necessa If some part or parameter is noticed to be missing, you may appropriately and should mention it clearly.	
Q.1, A)	 i. Briefly explain the steps involved in object oriented design. ii. Explain the need of flowchart? Which are the basic symbols used for drawing a flowchart? Illustrate your answer with an example. 	06 or
B)	 i. What do you mean by dynamic initialization of a variable? Give suitable example. ii. Write a program to read an array of size n demonstrating the use new and delete operators for dynamic allocation and deallocation memory. 	
Q.2. A)	Illustrate how friend function can be invoked in main (). Explain the mechanism by which it can access the class members which it has been declared with suitable example.	06 in
B)	 i. What is constructor? Explain the concept of parameterized constructor with suitable example ii. Describe the importance of destructor. Explain its use with the help of an example. 	06 c.
Q.3. A)	A book shop maintains the inventory of books that are being sold at the shop. The list includes details such as author, title, price, publisher a stock position. Whenever a customer wants a book, the sales person inputs the title and author and the system searches the list and displays is available or not. If it is not, an appropriate message is displayed. It is, then the system displays the book details and requests for the number of copies required. If the requested copies are available, the total cost the requested copies is displayed; otherwise the message "required copies in stock" is displayed. Design a system using a class called Boowith suitable member functions and constructors.	nd on s it f it oer of ies
B)	 i. What is object oriented programming? How it is different fr procedure oriented programming? ii. Explain the necessity of class diagram and its components in objoriented programming with suitable example. 	•
Q.4. A)	The class master derives information from both account and adr	min 06

C7B584B90A6F2E4613757AB6D17E454E

classes which in turn derive information from the class person. Define all the four classes and write a program to create, update and display the information contained in master objects using concept of virtual base class.

B) i. The class result inherits properties from test class with data members marks1, marks2 and marks3 and sports class with data member score. A test class in turn inherits the properties of student class with data member rollno. Write a program to create an object in main class and invoke all necessary methods, implementing the concept of hybrid inheritance. ii. We know that a private member of a base class is not inheritable. Is there any way possible for the objects of the derived class to access the private members of base class? If yes, how? Q.5. A) How are operators overloaded? Define a class to represent a complex 06 number having real part and imaginary part as data members. Write a program to add two complex numbers using operator overloading (Overload '+' operator). B) Two files named 'Source1' and 'Source2' contain sorted list of integers. 06 Write a program that reads the contents of both the files and stores the merged list in sorted form in a new file named 'Target'. Q.6. A) i. How is polymorphism achieved at 06 (a) compile time (b) run time ii. What is an exception? Can we throw class types as exceptions? Explain with the help of example. B) i. Explain try-catch block with suitable example. 06 When do we use multiple catch handlers? ii. Explain the following statements: (a) throw (b) throw() -Paper End---

	Winter Semester Examination - Dec - 2019		
Branch:	B.Tech. (Computer Engineering)	Sem: III	
Subject	with Subject Code: Computer Architecture & Organization[BTCOC304]	Marks:60	
Date:- 1	7-12-2019	Time: 3 H	rs
1 2 3 4 i	ions to the Students: Each question carries 12 marks. Attempt any five questions of the following. Illustrate your answers with neat sketches, diagram etc., wherever necessary. If some part or parameter is noticed to be missing, you may appropriately assume t clearly.	it and should	mentic
Q.1	Solve any following questions.		
(A)	What, in general terms, is the distinction between computer organization and architecture?	. }	06
(B)	Explain the computer: the top level structure with structural component with diagram.	neat sketch	06
Q. 2	Attempt the following questions.		
(A)	Enlist and explain any two addressing modes. Given the following memory values address machine with an accumulator, what values do the following instructions leaccumulator? • Word 20 contains 40. • Word 30 contains 50. • Word 40 contains 60 • Word 50 contains 70. a. LOAD IMMEDIATE 20 b. LOAD DIRECT 20 c. LOAD INDIRECT 20 d. LOAD IMMEDIATE 30	s and a one- oad into the	06
(B)			· ·
I.	Convert the following instruction into Accumulator based CPU, Register based C Instruction:(A*B)-(R+Z)/T	PU.	03
II.	Is RISC better than CISC? Illustrate your answer with example of processor.		03
Q.3	Attempt the following questions.		
(A)	Given $x = 1011$ and $y = 1001$ in twos complement notation (i.e., $x = -5$, $y = -7$), compute the product $p = x * y$ with Booth's algorithm flowchart.	draw and	06
(B)	Show how the following floating-point additions are performed (where significan	ts are	06

		:
	truncated to 4 decimal digits). Show the results in normalized form. a. 5.566 × 10 ² × 7.777 × 10 ³	
	a. 5.366 × 10 ° × 7.77 / × 10°	
	b. $3.344 \times 10^1 + 8.877 \times 10^{-2}$	
,	c. 6.21×10 ⁵ ÷8.877×10 ¹	
Q.4	Attempt the following questions.	
(A) ·	What are the differences among direct mapping, associative mapping? A set-associative cache consists of 64 lines, or slots, divided into four-line sets. Main memory contains 4K blocks of 128 words each. Show the format of main memory addresses.	9 6
(B)	Elaborate the concept of SRAM and DRAM memory with typical memory cell structure.	06
Q.5	Attempt the following questions.	
(A)	What is the overall function of a processor's control unit? A stack is implemented show the sequence of micro-operations for	06
	a. popping b. pushing the stack PUSH 10 PUSH 70 PUSH 8	
	ADD PUSH 20 SUB MUL	
(B)	What is the difference between a hardwired implementation and a microprogrammed implementation of a control unit?	06
Q.6	Attempt any two questions.	
(A)	In virtually all systems that include DMA modules, DMA access to main memory is given priority than CPU access to main memory. Why?	06
(B)	What is the meaning of each of the four states in the MESI protocol? Can you foresee any problem with the write-once cache approach on bus-based multiprocessors? If so, suggest a solution.	06
(c)	How does instruction pipelining enhance system performance? Elaborate your answer using RISC instruction stages.	06

DR. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY, LONERE - RAIGAD -402 103

Winter Semester Examination - Dec. - 2019

54

Branch: Information Technology
Subject with Subject Code: - Programming in Java (BTITE305B)
Date: -19/12/2019
Sem.:- V
Marks: 60
Time: - 3 H

Date: -19/12/2019 Time: - 3 Hr.

Instructions to the Students

- 1. Each question carries 12 marks.
- 2. Attempt any five questions of the following.
- 3. Illustrate your answers with neat sketches, diagram etc., wherever necessary.
- 4. If some part or parameter is noticed to be missing, you may appropriately assume it and should mention it clearly

Q.1 Solve any two (Marks) 6*2=12

- a) With neat diagram and example explain Java program structure.
- b) Explain different data types supported by Java.
- c) Design the program in java that uses different methods of Vector class.
- Q.2 Solve the following (12)
- a) What is constructor? Tell how it is used to initialize the object.
- b) Define Interface. Design the program that uses interface to achieve multiple inheritance.
- Q.3 Solve the following

 a) Define package. Develop the program that consist of two packages, one package is used to calculate factorial of given number and other will display Fibonacci Series up to given
- number.
 b) What is applet? How it is differ from application program? Also design small applet.
- Q.4 Solve any two 6*2=
- a) With neat sketch explain the life cycle of thread.
- b) What is Exception? Design the program that uses try, catch and finally block to handle the exception.
- c) Write a program in Java to demonstrate the use of multiple catch.
- Q.5 Solve the following (12)
- a) What is the use of Graphics class? Enlist and explain different methods and its use provided in Graphics class.
- b) Design an applet to display the front view of bus.
- Q.6 Solve the following (12)
- a) Draw and explain hierarchy of writer stream classes.
- b) Design the Java program to display the content of input file in terminal using byte stream classes.
